EDUCATION

University of British Columbia

Expected May 2027

Bachelor of Science - Computer Science; GPA: 3.9/4.0

Vancouver, BC

- Relevant coursework: Software Construction, Algorithms and Data Structures, Computer Systems, Relational Databases, Applied Machine Learning

TECHNICAL SKILLS

Languages: Java, C, C++, SQL, Javascript, Python, HTML, CSS

Frameworks & Libraries: JUnit, Java Swing, Mongoose, React.js, Express.js, Chakra UI, Discord.js, NumPy, Pandas

Tools & Technologies: Git, Node.js, npm, MongoDB, Amazon Web Services (AWS), gdb, Valgrind Memcheck

PROJECTS

Product Store | *React.js, Node.js, Express.js, MongoDB, Chakra UI*

Jan. 2025

- Developed a **full-stack web app** for a product store, ensuring seamless API integration and robust performance
- Implemented a responsive user interface using **React.js** and **Chakra UI**, enhancing user experience across mobile and desktop platforms
- Engineered a secure and scalable RESTful API using **Node.js** and **Express.js**, enabling efficient data exchange between the frontend and backend, resulting in a **25%** faster response time for queries

StoryTeller | *HTML, CSS, Javascript, React.js, AWS Polly, OpenAI API*

Nov. 2024

- Designed and implemented a web application that combines real-time text-to-speech narration with AI-generated visuals for the HackCamp hackathon
- Utilized **React.js** to build a responsive user interface, integrated **AWS Polly** for real-time text-to-speech functionality, and leveraged **OpenAI's** image generation API to create dynamic visuals
- Collaborated with **3** other team members using **Github** for version control, including creating branches, managing pull requests, and resolving merge conflicts to streamline development

Komorebi | *Javascript, Node.js, Discord.js, MongoDB, Mongoose*

Aug. 2024

- Developed a multipurpose **Discord bot** featuring **34** commands, including advanced moderation tools and a user levelling and economy system, resulting in a **40%** increase in server engagement
- Integrated **Mongoose** with **MongoDB** for data storage to manage user data efficiently across servers
- Implemented real-time event handling for commands using **Discord.js** for seamless interaction with the **Discord API**, reducing command latency by **25%**
- Deployed and scaled the bot to **30+** Discord servers, managing over **8,500** unique users while maintaining a **99.9%** uptime using AWS:EC2 and PM2

AutoMarket | *Java, JUnit, Java Swing*

Jan. 2024 – May 2024

- Designed a robust **Java car marketplace** application where users can view and purchase a diverse range of cars
- Applied object-oriented programming principles and design patterns to develop maintainable and efficient software
- Utilized **JUnit** to thoroughly test application code, achieving **100%** code coverage
- Used **Java Swing** to create an intuitive, user-friendly graphical interface

EXPERIENCE

Air Cadet

Sep. 2018 – Jun. 2022

Royal Canadian Air Cadets

Vancouver, BC

- Achieved a rank of **Sergeant** and the highest **Proficiency Level of 5**
- Delivered lessons on leadership, aviation, and survival to level one cadets
- Led cadets through drill practice, effectively communicated drill commands, and provided guidance and feedback, contributing to continuous improvement in drill proficiency

Crew Member

Nov. 2021 – Feb. 2022

McDonald's

Burnaby, BC

- Provided exceptional customer service to **1,000+** customers daily, ensuring satisfaction and resolving complaints efficiently
- Worked collaboratively with team members in a fast-paced environment to maintain smooth operations
- Adhered to strict health and safety protocols, including food preparation standards and cleanliness practices
